

Author Correction: Individual variations in cardiovascular-disease-related protein levels are driven by genetics and gut microbiome

Daria V. Zhernakova , Trang H. Le, Alexander Kurilshikov , Biljana Atanasovska, Marc Jan Bonder, Serena Sanna, Anniqve Claringbould, Urmo Võsa, Patrick Deelen , Lude Franke , Rudolf A. de Boer , Folkert Kuipers, Mihai G. Netea , Marten H. Hofker, Cisca Wijmenga , Alexandra Zhernakova, Jingyuan Fu , LifeLines cohort study and BIOS consortium

Correction to: *Nature Genetics* <https://doi.org/10.1038/s41588-018-0224-7>, published online 24 September 2018.

In the version of this paper originally published, there was a typographical error. In the Discussion, the sentence “In line with this, Ep-CAM-deficient mice exhibited increased intestinal permeability and decreased ion transport⁶⁰, which may contribute to CVD susceptibility risk⁵⁹” originally read iron instead of ion transport. This error has been corrected in the HTML, PDF and print versions of the article.
